Learning Objectives for the A-2 Exam

1. **Definitions:** The Aircraft Rescue Vehicle Technician shall define the terms and phases commonly used in connection with the operation and/or testing of ARFF Vehicles, to include the following:
 - 1.1. Vehicle Chassis:

a. Frame	g. Power Divider	m. Quick Build Up/ Air System
b. Axles	h. Wheels and Tires	n. Torque Converter
c. Brake Systems	i. Engines	o. Fluid Coupling
d. Suspension	j. Transmission	p. Tubing-hoses-fittings
e. Steering	k. Electrical Systems	
f. Transfer Case	l. Fuel System	
 - 1.2. Vehicle Components:

a. Body and Cab	d. Foam Agent Pump (not transfer pump)	f. Built in battery Charger
b. Eductor	e. Dual Agent Nozzle & Turret	g. Valves and plumbing
c. Proportioner		h. MADAS
		i. Generators
2. **Principles of operation:** Understand the basic operating principles of the chassis and its components.
 - 2.1. Identify Hydraulic and Air system symbols, such as:
 - a. Hydraulic Pump
 - b. Pressure Protection Valve
 - 2.2. Describe the Function and Application of the following:

a. Engine Governors	e. Steering and Suspension	i. Dual Agent Nozzle & Turret
b. All Wheel Drive	f. Built in battery charger	j. Windshield deluge system
c. Pump and Roll	g. Air Mechanical Brakes	k. Winterization system
d. Quick build up air systems	h. Air-over Hydraulic Brakes	l. Exhaust system
		m. Pressure relief valves
3. **Principles of Repair, Maintenance & Troubleshooting:** The Aircraft Rescue Vehicle Technician shall understand the principles of service of Aircraft Rescue and Fire-Fighting Vehicles.
 - 3.1. Identify Service and Preventative Maintenance Activities:

a. Types of inspections & procedures	d. Use of maintenance schedules
b. Purpose of visual inspections	e. Manufacturers "Accepted Practice" methods
c. Maintenance records	f. Procedures
	g. Vehicle retirement
 - 3.2. Troubleshooting and repair procedures:
 - a. Diagnose common problems
 - b. Interpret schematics/diagrams
 - c. Retrieve and interpret diagnostic codes
 - d. Describe use of diagnostic equipment
 - e. Understand operational test requirements
 - f. Identify "Accepted Practice" repair procedures
 - g. Identify Out-of-Service criteria
